

Demco 50 SERIES

**850 & 1250
GALLON
FIELD SPRAYERS**

MORE CONTROL BETTER MANEUVERABILITY

Demco's 850 and 1250 sprayers have a unique tank design. Its shape allows one of the shortest "hitch pin to axle" lengths in the industry (140"), enabling excellent tracking and maneuverability in the field. The tank has a molded-in trough that drains spills to rear of sprayer. The 100 gallon 2 stage sump provides optimum tank drainage and decreases sloshing.

The hydraulic front fold booms feature a nitrogen charged accumulator system combined with leveling linkage and shock absorbers to soften the ride. A live hydraulic control block requires only one set of remote outlets to perform all the boom functions.
